

# Coil Spring Spacer Application & Placement Guide

**ABOUT SPACER THICKNESS:** When installed on the front on (SLA) short, long arm suspensions, car height is raised approximately 2.5 to 3 times the thickness of the spacer. Rear installation on the housing raises approximately the spacer thickness. On the trailing arm it raises approximately 1.0 to 1.25 times the spacer thickness. Please reference the chart below to find the proper spring placement of your spacers.

1102, 1103, 1104, 1105, & 1106 FRONT SPACERS	
APPLICATION	PLACEMENT
<b>BUICK</b>
